

	Quality Management System	Rev. 01
	QUALITY POLICY	Page 1 of 1

Casazza, November 18, 2020

TEMA Energy srl is specialized in the design and production of components for the *Power Generation* and *Oil & Gas* sectors, such as burners, combustors and exhaust systems for gas turbines, with related services such as the supply of spare parts, execution of "flow tests" and non destructive test.

As a result of continuous development and innovation, in 2020 it decided to extend its business to the production of components and assemblies in alloy steels for gas turbines for the aeronautics, space and defence sector.

The **mission** of TEMA Energy srl is to consolidate and continuously increase its position in the markets in which it operates in order to represent a reference point recognized by sector operators.

For this purpose, the commitment of the Top Management is constantly focused to ensure:

- high products' quality, in compliance with Customers and other relevant interested parties requirements;
- continual development of *know-how* e *know-why*;
- tailored made service based on customer's requests, respecting the delivery time;
- a strong focus on problem solving, where competence, ability to find solutions and lessons learned from past experiences are key factors;
- the development, implementation and continuous improvement of the effectiveness and efficiency of the **Quality Management System**, in accordance with ISO 9001:2015 international standard, and as well as the EN 9100:2018 aerospace standard;
- an approach aimed at ensuring that personnel operate on a daily basis in full **awareness** of the importance and potential consequences of their work, and that this is also extended to suppliers, so that they are part of all processes.

For achieving these objectives, the Top Management considers essential the enhancement, motivation and development of personnel, as well as their involvement to improve Quality, in order to promote a common vision corporate objectives.

Furthermore, the Top Management undertakes to review the Quality Management System annually, to ensure its continuing suitability, adequacy and effectiveness, in order to increase customer and other relevant interested parties satisfaction.

The Chief Executive Officer
 Ing. Paolo Zani
